EDUCATION

University of Notre Dame

Bachelor of Science in Computer Science; Mathematics Minor

GPA: 3.794

May 2029

HONORS

- Recipient of **William F. Reilly Trustee Scholarship**, a four-year merit-based award at Notre Dame University

EXPERIENCE

First Year Council

Sep 2025 – Present

National Society of Black Engineers

Notre Dame, IN

- Collaborate with upper-class engineering leaders to support initiatives that strengthen Black student representation in STEM
- Shadow project leads across committees to learn organizational strategy, event planning, and community outreach while contributing research and logistical support to ongoing programs
- Develop leadership and teamwork skills by assisting in the execution of campus events, mentorship programs, and diversity-in-engineering initiatives that connect students with professional opportunities

Full Stack Developer

Feb 2025 – July 2025

Pivot Access Ltd

Kigali, Rwanda

- Worked on a team to maintain system infrastructure using Kubernetes, Docker, Prometheus, Grafana, Loki, and New Relic to monitor and optimize performance
- Automated deployment pipelines and system monitoring, reducing downtime and improving reliability across services

Front End Developer & Research Intern

Aug 2023 – Feb 2025

Pivot Access Ltd

Kigali, Rwanda

- Implemented responsive front-end designs with React Hooks and Tailwind CSS, improving usability and engagement across web applications
- Used PostgreSQL to study and analyze multivariate data and Matplotlib to visualize results to inform research-driven insights and decision-making on design implementation

PROJECTS

Research Scholar

Jun 2024 – Aug 2024

Lumiere Research Scholars Program

Remote

- Conducted independent research on the implementation of Artificial Intelligence in Sub-Saharan African legal systems, analyzing its impact on judicial efficiency, fairness, and access to justice
- Applied a comparative case-study methodology to evaluate AI adoption in African countries, assessing benefits such as reduced case backlogs alongside risks including algorithmic bias, data scarcity, ethical concerns, and public trust
- Critically examined challenges unique to the Global South, including technological colonialism, political structures, and infrastructure limitations, contrasting them with AI deployment models in the Global North
- Produced a comprehensive research paper proposing responsible and context-aware frameworks for integrating AI into justice systems while safeguarding human rights and institutional accountability

Brilliant Sciences Website

Aug 2023 - Dec 2023

Personal Project

Kigali, Rwanda

- Built a full-stack science learning platform using Next.js and React, featuring interactive quizzes, and real-time progress tracking
- Deployed on Vercel with scalable API routes and accessible UI with optimized loading and smooth interaction

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (PostgreSQL), JavaScript, HTML/CSS

Frameworks: React, Next.js, Node.js, Flask, Spring Boot, FastAPI, JUnit, Material-UI

Developer Tools: Git, GitLab, Docker, Prometheus, Grafana, Loki, VS Code, Visual Studio, PyCharm

Libraries: pandas, NumPy, Matplotlib, React Hooks, Storybook
